

# Welcome to G6's BeatPad

BeatPad is a program when a user can map sounds to a 4x4 grid of buttons and then once buttons are mapped, users can play those sounds to create music.

To map a sound, simply navigate to

- 1-the "File" button
- 2-hit "Add path" (alternatively shift + A),
- navigate to the folder containing your sounds,
- 3-highlight sound folder
- 4-hit "choose"

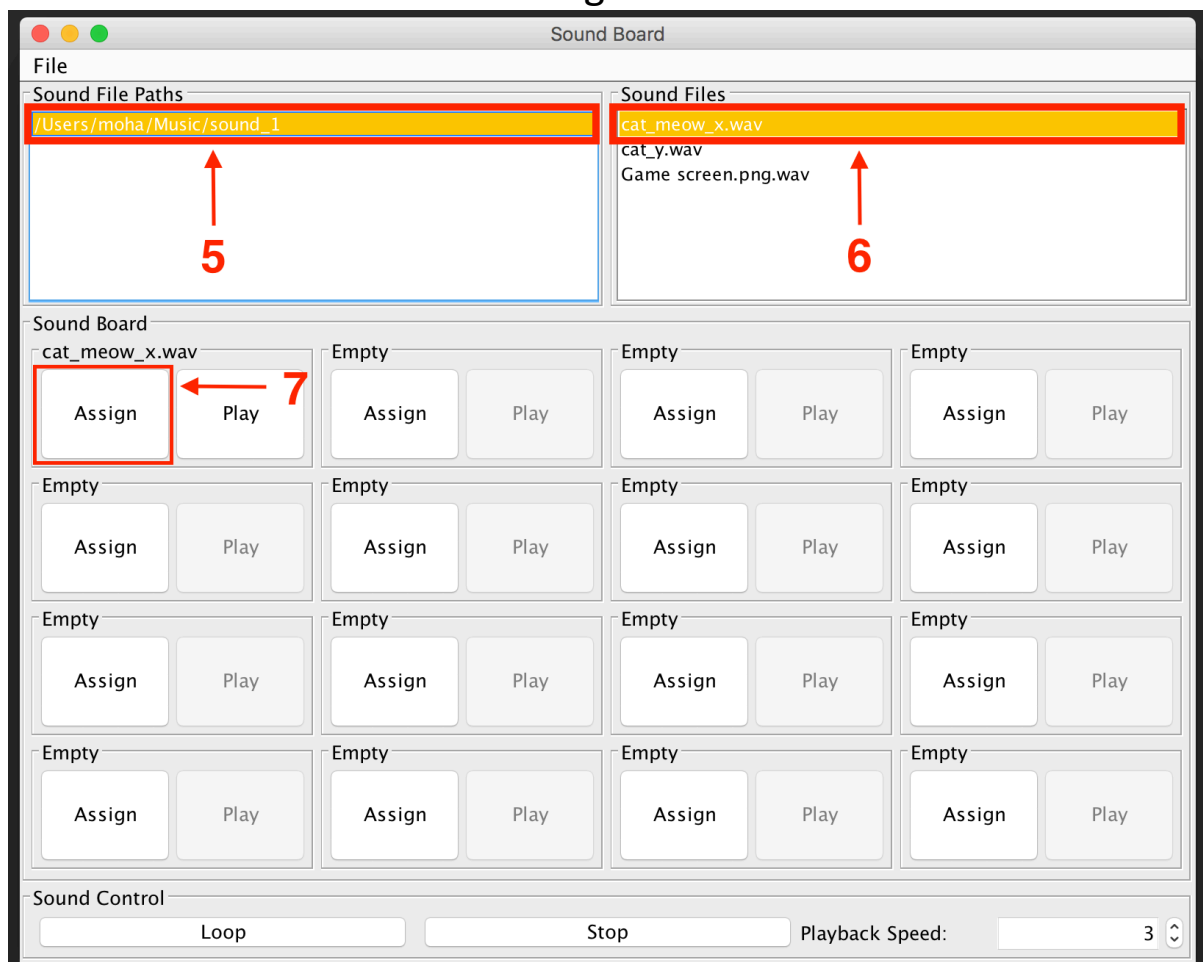

Now it is time to map a sound. Using the browser at the top of the window,

5-which now has the file path you added,

6- find and highlight your desired sound.

7-Then you need to navigate to the button you want to assign the sound to and click the "Assign" button.

Rinse and repeat the above steps with the rest of the buttons as you see fit.

You are now ready to make some sweet tunes, have fun!
